Live Portfolio

PROFESSIONAL SUMMARY

Results-driven Python Full Stack Developer with hands-on experience building production-grade web applications using Django, React, and Google Cloud APIs. Proficient in developing RESTful APIs, implementing OAuth 2.0 authentication, and integrating AI capabilities using Google Gemini API. Successfully deployed a full-stack AI application live on Vercel and Render. Seeking a Python/Django developer role to contribute technical expertise and deliver impactful solutions.

TECHNICAL SKILLS

Frontend:	React.js, JavaScript, HTML5, CSS3, Bootstrap 5, Vite, Axios
Backend:	Python, Django, Django REST Framework, RESTful APIs, Gunicorn
Database:	MySQL, PostgreSQL
AI & APIs:	Google Gemini AI, Gmail API, Google OAuth 2.0, Google Cloud Console
Auth:	JWT (JSON Web Tokens), OAuth 2.0
Deployment:	Vercel, Render, Git, GitHub
Tools:	Postman, VS Code, Git, GitHub

PROJECTS

AI-Powered Email Assistant [FLAGSHIP PROJECT]

[Live Demo](#) | [GitHub](#)

Tech Stack: React.js, Django, Django REST Framework, PostgreSQL, Google OAuth 2.0, JWT, Gmail API, Google Gemini AI, Bootstrap 5

- Built production-grade full-stack AI email assistant deployed live on Vercel (frontend) + Render (backend)
- Implemented Google OAuth 2.0 + JWT authentication for secure multi-user access with token refresh
- Integrated Gmail API to fetch, read, send and reply to real emails from users' Gmail accounts
- Integrated Google Gemini AI for 5 AI features: email composition, improvement, reply generation, subject suggestions & summarization
- Developed 12+ RESTful API endpoints using Django REST Framework with JWT-protected routes
- Implemented multi-user architecture with individual Gmail OAuth tokens stored per user in PostgreSQL

Leave Management System with AI Validation

Tech Stack: Python, Django, MySQL, HTML, CSS, Bootstrap, Google Gemini AI

- Developed web-based leave management system with role-based access control for employees and HR
- Integrated Google Gemini AI for automated leave reason validation and approval recommendations
- Implemented employee creation, leave application tracking, and search by name or email

Employee Management System

Tech Stack: React.js, JavaScript, Bootstrap

- Built React-based employee management system with complete CRUD operations
- Designed fully responsive UI using React components and Bootstrap 5

INTERNSHIP EXPERIENCE

Python Full Stack Developer Intern

2024 – 2025

Ducat India, Noida

- Developed web applications using Python, Django, and MySQL with focus on backend API development
- Built and consumed RESTful APIs for frontend-backend communication
- Implemented CRUD operations and database integration using Django ORM
- Gained hands-on experience with HTML, CSS, JavaScript, and React.js for responsive frontend development

EDUCATION

B.Tech in Computer Science & Technology

Expected June 2026

Vision Institute of Technology, Sahapur, Aligarh

KEY ACHIEVEMENTS

- ✓ Deployed production AI app live on Vercel + Render at \$0/month
- ✓ Integrated Google Gemini AI — key differentiator among fresh graduates
- ✓ Implemented industry-standard OAuth 2.0 + JWT authentication
- ✓ Built real Gmail API integration — actual email sending, not mock data
