

RAJAT SHARMA

Full Stack Developer

+91 7983346914 | rajatsharma09302005@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

TECHNICAL SKILLS

Frontend

React.js, JavaScript, HTML5, CSS3, Bootstrap 5, Vite, Axios

Backend

Python, Django, Django REST Framework, RESTful APIs, Gunicorn

Database

MySQL, PostgreSQL

AI & APIs

Google Gemini AI, Gmail API, Google OAuth 2.0, Google Cloud Console

Auth

JWT (JSON Web Tokens), OAuth 2.0

Deployment

Vercel, Render, Git, GitHub

Tools

Postman, VS Code, Git, GitHub

EDUCATION

B.Tech in Computer Science & Technology

Vision Institute of Technology, Aligarh
Graduated June 2026

KEY ACHIEVEMENTS

- Deployed a production AI app live on Vercel + Render at \$0/month hosting cost
- Implemented industry-standard OAuth 2.0 + JWT authentication
- Integrated Google Gemini AI — a key differentiator among peer applicants
- Built real Gmail API integration for live email sending, not mock data

LANGUAGES

English

Professional Proficiency

Hindi

Native

PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of experience building production-grade web applications using Python, Django, React.js, and MySQL/PostgreSQL. Skilled in developing secure RESTful APIs, implementing JWT and Google OAuth 2.0 authentication, and integrating AI capabilities via the Google Gemini API and Gmail API. Currently delivering full-stack features at SoftCode Technologies, with a flagship AI-powered application independently built and deployed live on Vercel and Render.

EXPERIENCE

Full Stack Developer — SoftCode Technologies (FULL-TIME) *Mid 2025 – Present*

- Developed and maintained** full-stack web applications using Python, Django, React.js, and MySQL
- Built and secured REST APIs**, implementing JWT and Google OAuth 2.0 authentication for controlled user access
- Integrated Google Gemini AI and Gmail API** to power AI-driven email automation features
- Optimized application performance and collaborated via **Git/GitHub** to deliver scalable, user-focused solutions

Python Full Stack Developer Intern — Ducat India, Noida *2024 – 2025*

- Developed web applications using **Python, Django, and MySQL** with a focus on backend API development
- Built and consumed **RESTful APIs** for frontend–backend communication
- Implemented CRUD operations and database integration using **Django ORM**
- Gained hands-on experience with **HTML, CSS, JavaScript, and React.js** for responsive frontend development

PROJECTS

AI-Powered Email Assistant FLAGSHIP PROJECT

Live: [Project Link](#)

Tech Stack: React.js, Django, Django REST Framework, PostgreSQL, Google OAuth 2.0, JWT, Gmail API, Google Gemini AI, Bootstrap 5

- Built a production-grade full-stack AI email assistant** deployed live on Vercel (frontend) + Render (backend)
- Implemented Google OAuth 2.0 + JWT authentication** for secure multi-user access with token refresh
- Integrated **Gmail API** to fetch, read, send, and reply to real emails from users' Gmail accounts
- Integrated **Google Gemini AI** for 5 AI features: email composition, improvement, reply generation, subject suggestions, and summarization
- Developed 12+ RESTful API endpoints** using Django REST Framework with JWT-protected routes
- Implemented multi-user architecture** with individual Gmail OAuth tokens stored per user in PostgreSQL

Leave Management System with AI Validation

Tech Stack: Python, Django, MySQL, HTML, CSS, Bootstrap, Google Gemini AI

- Developed a web-based leave management system with **role-based access control** for employees and HR

- Integrated **Google Gemini AI** for automated leave reason validation and approval recommendations
- Implemented employee creation, leave application tracking, and search by name or email

Employee Management System

Tech Stack: React.js, JavaScript, Bootstrap

- Built a React-based employee management system with complete **CRUD operations**
- Designed a fully responsive UI using React components and Bootstrap 5
